Specification

The disclosure is objected to because of the following informalities:

Paragraphs 0001, 0021 and 0023 contain blanks referencing a copending U.S. Application.

The examiner believes that these blanks should reference U.S. Application No. 10/650,117 filed August 27, 2003.

Appropriate correction is required.

Allowable Subject Matter

Claims 1-19 allowed.

The following is an examiner's statement of reasons for allowance:

As to claims 1 and 12, the prior art of record, taken alone or in combination, fails to disclose or render obvious a method or apparatus for detecting sensor phase in a sensor array including: transmitting an interrogation signal into a sensor array of sensor elements and a plurality of spaced apart inline reflector sensors, wherein each sensor element comprising the optical transmission path between two inline reflectors; receiving a reflected signal from the sensor array; and applying an inverse scattering algorithm to the reflected signal to reduce crosstalk interference, in combination with the rest of the limitations of claims 1 and 12.

As to claim 19, the prior art of record, taken alone or in combination, fails to disclose or render obvious a computer readable medium comprising software that, when executed by a processor, causes the processor to process signals reflected from a sensor array using a method including: (a) determining Jones matrices for a sensor within the sensor array; (b) computing a sensor phase for the sensor; (c) computing a transfer matrix; (d) determining the forward and

backward propagating optical fields from the sensor; and (e) repeating steps (a), (b), (c) and (d) for each other sensor in the sensor array, in combination with the rest of the limitations of claim 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
